This study aims to analyze the internal control of accounts receivable at PT. Farza Indo Cahaya Abadi to minimize the tendency to increase the number of bad debts that occur. This research uses descriptive qualitative research method. The focus of this research is to analyze the internal control of accounts receivable based on the components of the internal control system according to COSO which consists of the control environment, risk calculation, information and communication, control activities, and monitoring. Based on the results of research conducted, it can be concluded that the internal control system for accounts receivable is PT. Farza Indo Cahaya Abadi has been running well, although there are aspects that have not been carried out optimally, such as risk calculations. However, most aspects of the internal control of accounts receivable such as the control environment, information and communication, control activities, and monitoring have been running well.
